LOG BOOK

Date	Summary of Decisions	Responsibilities Allocated	Assigned Tasks Achieved	Obstacles
5/3	- User stories on Google Doc	None	- Started brainstorming ideas of user stories - Collected a list of possible user stories - Created a draft of the user stories	Time management
6/3	- Uploaded drafts to GitHub	None	- Finished first draft of user stories	
27/3	- Start class diagram	<u>Everyone</u> - Finish class diagram		
28/3	- Finished class diagram	<u>Alan</u> - System + Staff classes + Order + Mains <u>Lucy</u> - Drinks + Sides classes <u>Rahul</u> - Inventory classes	- Finished class diagram	- Unable to find a long period of time for everyone to meet up other than in labs, will be a problem for discussing and implementing backend - Other courses have midterms and assignments decreasing the amount of time able to work on the code
29/3			- Finished implementation of the classes and thus the backend	
3/4	- Delegated responsibilities	<u>Alan</u> - Implementing ordering mains frontend <u>Lucy</u> - Implementing ordering sides frontend <u>Rahul</u> - Implementing increasing inventory frontend		
10/4	- Agreed on timeframe to commit some	<u>Alan</u> - Implementing ordering premade		- Pickle issues where code works on one computer but not on another, hindering

	working code for frontend for code review and estimated velocity	mains frontend <u>Lucy</u> - Implementing ordering drinks frontend <u>Rahul</u> - Class diagram + User stories		debugging
17/4	- Agreed on inclusion of sundaes			- Miscommunication over the implementation of classes and how and in what format information is accessed - Code is starting to get extremely long with repetitions that we don't know how to remove
19/4	- Delegated further responsibilities to finish Milestone 3	<u>Alan</u> - Implementing checkout + updating status + staff portal + id tracking frontend <u>Lucy</u> - Velocity chart + test cases <u>Rahul</u> - ER Diagram + test cases	<u>Alan</u> - Implemented ordering mains + premade mains frontend	
21/4			<u>Alan</u> - Implemented ordering sides + drinks frontend with assistance from lucy - Implemented inventory frontend(increasing inventory amount) with assistance from rahul <u>Lucy</u> Assisted in the completion of the sides + drinks frontend <u>Rahul</u> Assisted in the completion of the inventory frontend	
22/4			<u>Alan</u> - Implementing checkout + updating status frontend <u>Lucy</u>	

			- Velocity chart + Class diagram + test cases + completed the auto-inventory decrement function Rahul - ER Diagram + test cases	
27/4			Alan Made final edits to the ER diagram (previous version used incorrect notations and did not implement staff side) Made final edits to the user stories with inclusion of new specifications released in milestone3 Made final edits to the class diagram with changes to some of the attributes which did not align with our implementation correctly	

Milestones Achieved

Date	Milestone
6/3	- MIlestone 1 done (User Stories)
7/4	- Milestone 2 done
21/4	- Milestone 3 done(1st part)
28/4	- Milestone 3 done(2nd half)
